

LEGION M600 WIRELESS GAMING MOUSE

A REVOLUTION IN WIRELESS GAMING.

LONG-LASTING, LOW-LATENCY WIRELESS GAMING IS HERE.

Never lose a gaming session because of latency or a dead battery again. The Lenovo™ Legion M600 Wireless Gaming Mouse sports an ultra-long battery life that can last up to 200 hours and a cutting-edge 1000 Hz polling rate usually reserved for wired gaming mice. With an M600 in hand, you'll dominate the latest titles and look great while you do with 16.8 million LED colors to choose from.

WHY YOU NEED THE LENOVO LEGION M600 GAMING MOUSE

Battery problems, solved

Short battery life and inconvenient charging are why gamers avoid wireless mice. The Legion M600 breaks the mold and offers up to 200 hours of battery life when full, and up to 10 hours of life from a rapid 5-minute charge by Type-C™ port.

Performance, as it should be

Most wireless mice struggle with performance. The M600 leads the pack with a game-changing 1000 Hz polling rate, Omron® Microswitches that are good for 50 million clicks, and an ultra-precise 16,000 DPI adjustable sensor (40 g / 400 IPS).

Ergonomic, for all needs

The Legion M600 Wireless Mouse is crafted to deliver all-day comfort and pain-free playing to both right and left-handed gamers, and whether they prefer 'claw grip' or 'palm grip.'
