

LENOVO G27 MONITOR

GETTING PLAYERS READY

TOOL UP WITH A GREAT GAMING AND ENTERTAINMENT PERFORMER

When it comes to performance, Lenovo G27-20's got game. Let's start with a look at its 27-inch 1920 x 1080 full HD resolution In-Plane Switching panel display that delivers startlingly life-like lighting effects to gameplay in a luminous 400 cd/m², thanks to HDR decoding¹ on-the-fly. It never misses a beat, even in the most intense moments, because its speedy 144Hz refresh rate and 1ms MPRT² response time, coupled with AMD FreeSync™ Premium³, remove image stutter, break, tear and streak from the experience, leaving a smooth, fluid unspoiled session. Besides, the 99% sRGB color gamut display featuring true 8-bit color will make your gameplay impressive for sure.

And, as bright as this display is, users can watch comfortably because TÜV Rheinland Low Blue Light and TÜV Rheinland Flicker Free technology can protect eyes from blue light harm on a sliding scale, as well as cut out screen flicker. All these enhance your viewing pleasure plus a vastly reduced chance of eye fatigue. Aside from eye comfort, G27-20's new future-cool form factor helps comfortable sitting, too. Its upgraded Vector V base with modern blue accent also lifts the screen head a full 130 mm and tilts between -5° and 22° to always be in the most ergonomic position for endless hours of comfortable Esports or binge-watching a show that just dropped. Lenovo Artery software⁴ gives gamers the chance to seamlessly tweak screen performance to optimize their gameplay experience directly on screen through their PC. So, it saves time for gamers to sit and play in comfort with zero distractions.

FEATURES OF LENOVO G27-20 MONITOR

Let your game shine

G27-20 holds a 27-inch FHD 1920 x 1080 resolution In-Plane Switching panel display to render stunning game graphics with no color distortion, even at the widest possible viewing angles. Bright and right, with HDR decoding viewers are treated to a bright 400 cd/m² display, while colours are bright, vivid and compellingly lifelike thanks to the 99% sRGB color gamut and true 8-bit color.

Utterly stutter-free gaming

Nothing but smooth, natural movement as far as the eye can see. G27-20 delivers fluid motion thanks to its rapid refresh rate of 144Hz, 1ms MPRT² response time and AMD FreeSync™ Premium³. And that means players can enjoy the spoils of victory, not suffer the spoils of torn frames, image lag or motion blur. Let the action flow.

Comfort dialed to the max

Play and display. G27-20's sci-fi chic looks bring an edge to any gaming room. Carrying TÜV Rheinland Low Blue Light and TÜV Rheinland Flicker Free certification, its flicker-free and variable Low Blue Light settings reduce eye fatigue. While its stand lifts and tilts the screen to the ideal height for users' comfort. Lenovo Artery software⁴ gives gamers the chance to seamlessly tweak screen performance to optimize their gameplay experience directly on screen through their PC, then readjust the settings to make the most of movies.
